

## LIMPID LIGHTS

color 2020

We figured a way to color the Limpid Lights in custom colours. The shades are man-made and the colours are added with a special technique. As you will notice the color is not a paint, but there is made use of a new nano technique. This way we are not obliged to use a coloured glass, the glass is transparent and get's a matt coloured surface.

While collaborating with architects, interior architects, designers and stylists all over the world we figured the tool to customise projects. With the Limpid Lights collection we managed to color them in requested colours. When you are interested in a custom coloured Limpid Light you can contact our team. We provide a color sample to be able to check the right color. Not every color is possible, but there are endless possibilities. The lights are made by people instead of machines. The shades are handmade and the colours are added with a special technique. As you will notice the color is not a paint, but there is made use of a new nano technique and the glass is transparent.
