

O-O-O

O-O-O proposes a low voltage source of light which provide subtle illumination dressing the space in an elegant way. The light structure is touchable and does not cause annoying glare when you look at it. O-O-O light is a perfect fit as a decoration element.

O-O-O has many custom options. As a modular lighting system you decide how many elements you want to add in your composition, from the number of lines to add to the specific height. The result is a lightweight system which easily gets integrated into a space matching the environment and situations by regulating the light intensity.

SUGGESTIONS

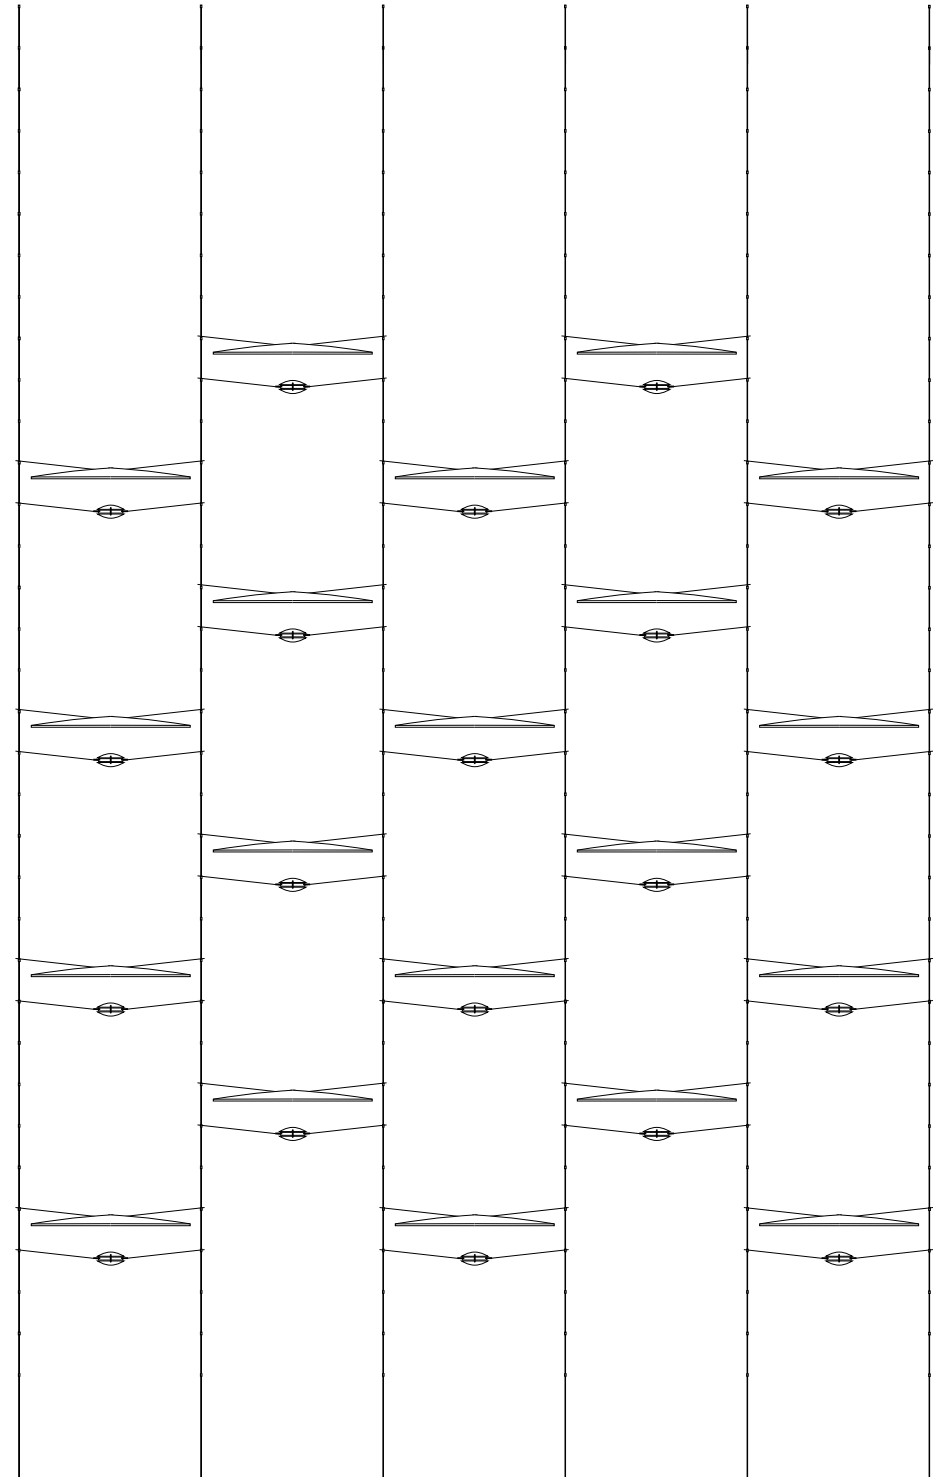

0-0-0 gives you endless possibilities in compositions.

Choose the number of modules and suspension wires to your wishes and vary in shapes and sizes. It is possible to add modules and wires to your collection in a later stage due to the modular railsystem.

VANTOT; CONTRIBUTING TO THE TRANSITION OF LIGHT

SAM VAN GURP & ESTHER JONGSMA

VANTOT

For Dutch duo VANTOT, it's all in the name. Literally translated from Dutch to mean 'from to', VANTOT focuses on the entire process, starting with a technique and ending with the product. The pair strives to find new applications for innovations in everyday life, and it's not only new-found technologies which have seized their interest. Serving as a guiding light in the duo's work, antiquated techniques are put to good use in modern day outlets, mutually benefiting from today's updated knowledge base.

Take electricity. Although light bulbs have been around for centuries, innovations – such as the rise of the LEDs – have made continuous evolution possible. And today, electronic devices operate on much lower voltages than ever before, significantly decreasing its hazardous aspects. While direct contact with electricity – and light – used to be a no go, recent developments illuminate completely new realms for the old technology.
