

PASSAGE COLLECTION

COLLECTION 2017

Esther Jongsma graduated from the Design Academy Eindhoven with her work 'Passage' in 2013. In this collection, old and new techniques meet. The traditional craft of patterned wooden floors and wood inlaying is translated to the modern technique of laser cutting. Initially, the 'Passage Collection' included a carpet and a room divider. Later, the collection expanded with a table, side table and a plateau.

The intricate pattern and design of 'Passage Table' is timeless. The tabletop consists of a wooden inlaid, graphical pattern, and is finished with a smooth satin gloss. The table is supported by solid, metal legs with a-centric feet resulting in a slightly lighter base that can be easily deconstructed. Additionally, the table can be requested with a plain, white oak tabletop without graphical pattern for those who prefer a more simple design.

A TABLE ORGANISER.

PASSAGE TABLE

PRODUCT USE	Indoor
DIMENSIONS	270 x 90 x 75 (l x w x h)
COLORS	Neutral - Black (inlaid pattern) Neutral - Blue (inlaid pattern) Neutral - Brown (inlaid pattern) Plain Oak (no pattern)
MATERIALS	Inlaid plywood
FINISH	Coating

DISCOVER

VANTOT works in translating innovative and experimental ideas into refreshing applications, products, and installations. Sometimes, products are made on request as a project. We are specialized in lighting and also creating other products in different categories which will be shown in the following content.

PASSAGE COLLECTION

VANTOT

For Dutch duo VANTOT, it's all in the name. Literally translated from Dutch to mean 'from to', VANTOT focuses on the entire process, starting with a technique and ending with the product. The pair strives to find new applications for innovations in everyday life, and it's not only new-found technologies which have seized their interest. Serving as a guiding light in the duo's work, antiquated techniques are put to good use in modern day outlets, mutually benefiting from today's updated knowledge base.

Take electricity. Although light bulbs have been around for centuries, innovations – such as the rise of the LEDs – have made continuous evolution possible. And today, electronic devices operate on much lower voltages than ever before, significantly decreasing its hazardous aspects. While direct contact with electricity – and light – used to be a no go, recent developments illuminate completely new realms for the old technology.
