

## COSMOS

SPECIALS 2021

Cosmos is the largest lighting figure in VANTOT's collections. The vertical chandelier concept was inspired by traditional/industrial design combined with a high-tech production process.

This collection strives to bring the most out of architectural design, together with the designers you can create endless elevations of chandeliers.

VANTOT advances the flexibility of customization regarding weights and heights by offering differently sized metal compositions.

Unlike traditional lighting, the electricity runs through the metal frames.

The cut glass bulbs create a unique perception of light made by professional glass-makers. With a rich history regarding glass blowing and sufficient resources, the Czech Republic has become our choice of manufacturing.

VANTOT is the collective title for the works of Esther Jongsma and Sam van Gorp who are united by an unstoppable drive to create and innovate. The studio is specialized in translating experimental ideas into refreshing products and installations.

## COSMOS SPECS

CODES	#622 - BODY
	#615 - GLASS SHAPE CLEAR
	#608 - GLASS SHAPE HORIZONTAL
	#592 - GLASS SHAPE VERTICAL
	#585 - CANOPY
LIGHT SOURCE	LED integrated
	100-240V
	Dim to warm
	CRI 85
DIMENSIONS	Installation specific
MATERIAL	Steel
	Handblown glass
	Handcutted glass
WEIGHT	Installation specific
DIMMABLE DRIVER	24V, dimmer not included

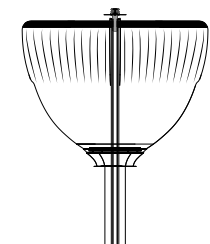

Cosmos offers the possibility to adjust the number of elements to the number of chandeliers you put above each other. On request we can easily change the size of the frame. The size of the glass is restricted.

## TECHNICAL DRAWINGS

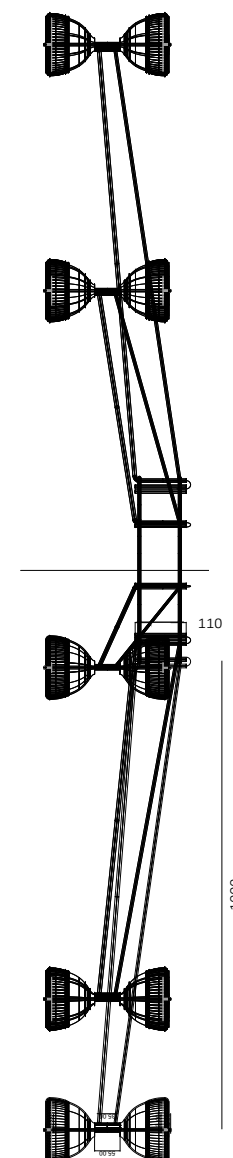

### OPTION A

1 X #622 - BODY

6 X #592 - GLASS SHAPE VERTICAL

The light bulbs face upwards.

### OPTION B

1 X #622 - BODY

12 X #592 - GLASS SHAPE VERTICAL

The light bulbs face both sides, upwards and downwards.

## DISCOVER

VANTOT works in translating innovative and experimental ideas into refreshing applications, products, and installations. Sometimes, products are made on request as a project. We are specialized in lighting and also creating other products in different categories which will be shown in the following content.

## **VANTOT**

For Dutch duo VANTOT, it's all in the name. Literally translated from Dutch to mean 'from to', VANTOT focuses on the entire process, starting with a technique and ending with the product. The pair strives to find new applications for innovations in everyday life, and it's not only new-found technologies which have seized their interest. Serving as a guiding light in the duo's work, antiquated techniques are put to good use in modern day outlets, mutually benefiting from today's updated knowledge base.

Take electricity. Although light bulbs have been around for centuries, innovations – such as the rise of the LEDs – have made continuous evolution possible. And today, electronic devices operate on much lower voltages than ever before, significantly decreasing its hazardous aspects. While direct contact with electricity – and light – used to be a no go, recent developments illuminate completely new realms for the old technology.
