EXPLODED VIEW

COLLECTION 2014

Do we understand what happens when we dim our lights? How can we include dimming as a part of the design? These are some of the questions that triggered the design of Exploded View, a series of lighting objects that incorporate movement as a key element of its design.

By moving the light-source away from, or closer to the lighting object, the intensity of the light can be adapted. After all, the sun never fades; it is the earth that moves closer and further away, causing the light to reflect, change colour, dim or die.

	600 lm CRI 90
DIMENSIONS	200 x 200 x 250 mm (l x w x h) Package 1 box 250 x 250 x 300 mm (l x w x h)
NETTO WEIGHT	1 kg
MATERIALS	Cutted and coated steel, acrylic
DIMMABLE DRIVER	Dimmer not included

DISCOVER

VANTOT works in translating innovative and experimental ideas into refreshing applications, products, and installations. Sometimes, products are made on request as a project. We are specialized in lighting and also creating other products in different categories which will be shown in the following content.

VANTOT

For Dutch duo VANTOT, it's all in the name. Literally translated from Dutch to mean 'from to', VANTOT focuses on the entire process, starting with a technique and ending with the product. The pair strives to find new applications for innovations in everyday life, and it's not only new-found technologies which have seized their interest. Serving as a guiding light in the duo's work, antiquated techniques are put to good use in modern day outlets, mutually benefiting from today's updated knowledge base.

Take electricity. Although light bulbs have been around for centuries, innovations – such as the rise of the LEDs – have made continuous evolution possible. And today, electronic devices operate on much lower voltages than ever before, significantly decreasing its hazardous aspects. While direct contact with electricity – and light – used to be a no go, recent developments illuminate completely new realms for the old technology.
